Do the Cable Ties you carry meet the UL Type 21S Certification?

The National Electrical Code (NEC) permits **UL Type 21S certified cable ties** to be used as Supporting Devices in electrical installations.

Type 21S Supporting Device classification certifies products for their suitability in providing primary support for flexible conduits, tubing, and cable in accordance with the maximum spacing intervals when specified in the relevant national installation codes.

ACT is Type 21S certified for 50 lb. and 120 lb. Natural, Burgundy, Colors and UV Black cable ties. ACT continually strives to provide you with products that are certified to the highest industry standards.
